

Site Name : the return of attention

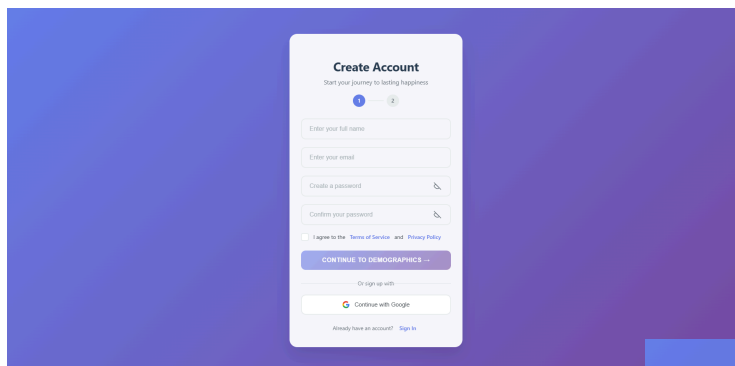

Theme : Spiritual/Meditation/mindfulness exercises

Main Pages :

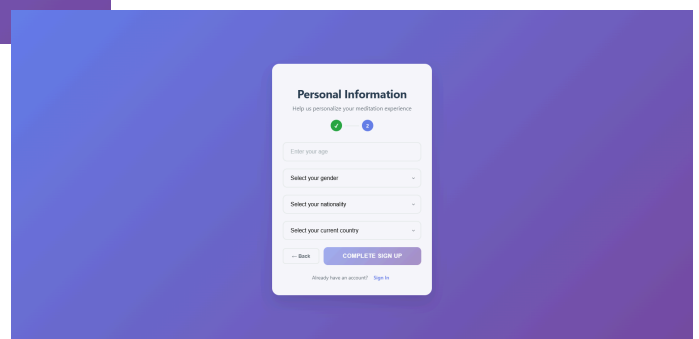

Landing Page : Intro about the web app with call to actions

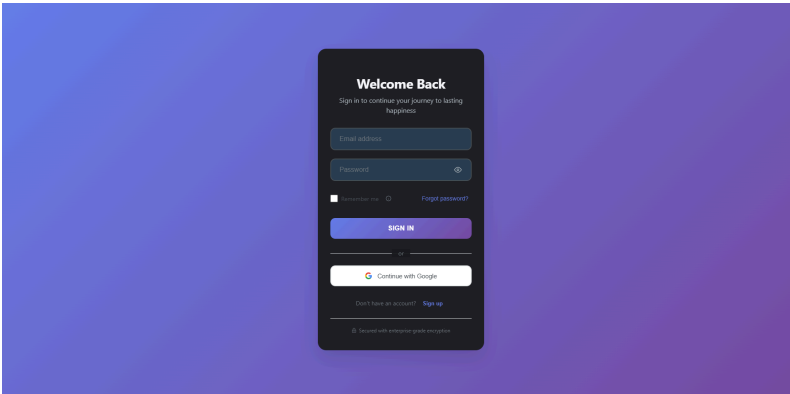

Login and Signup pages : should be able to log with google as well, need a way to reset pw for forgotten ones as well and an email verification process.

Create acc consist with two stages,
Account info and personal info

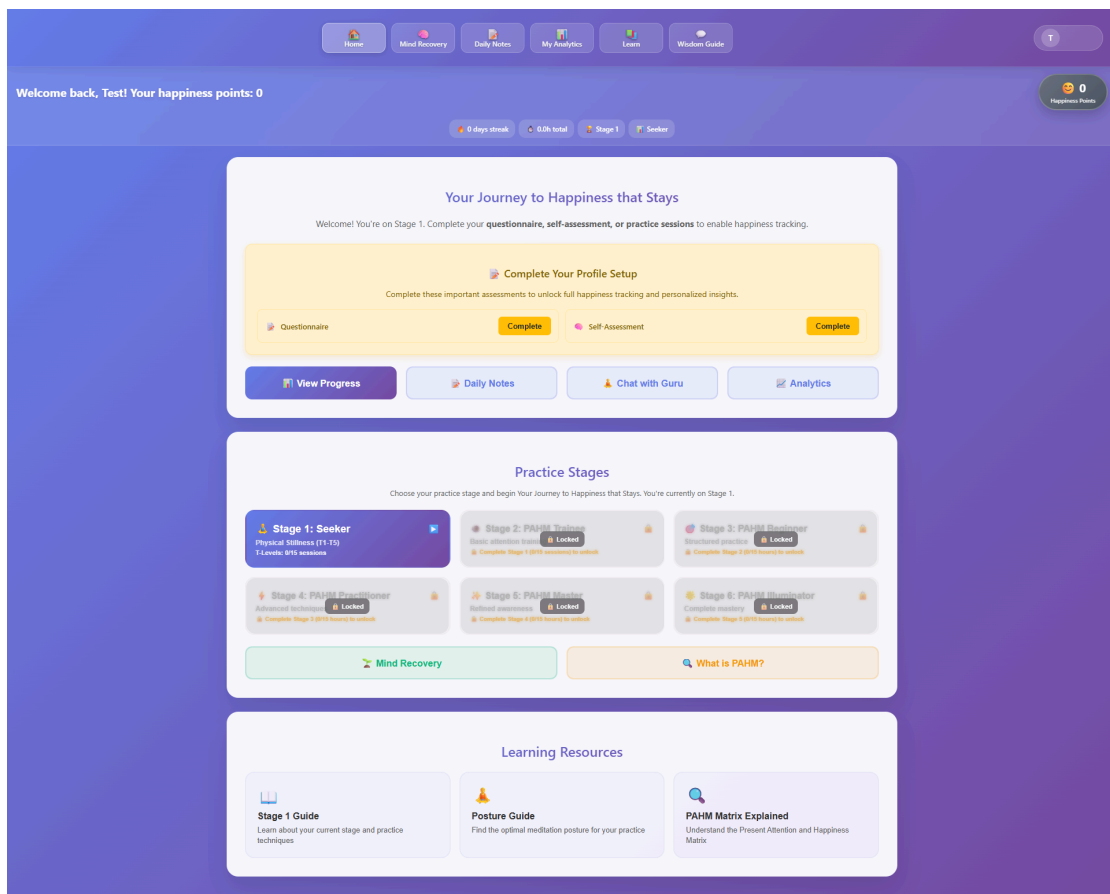

Personal info must collect from the users who sign up with google as well.

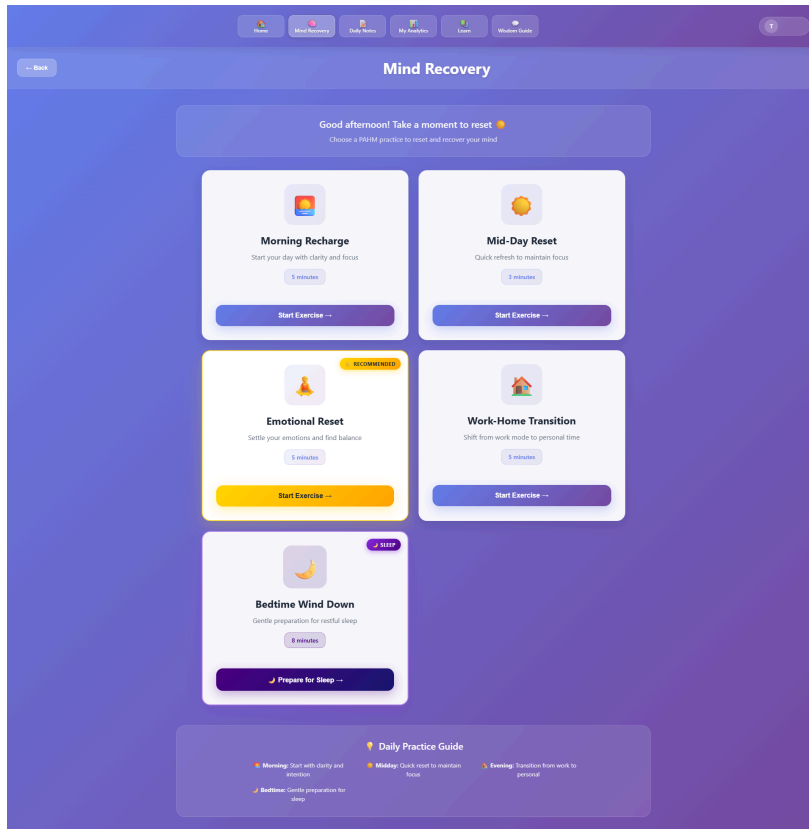

Main Dashboard (Home) :

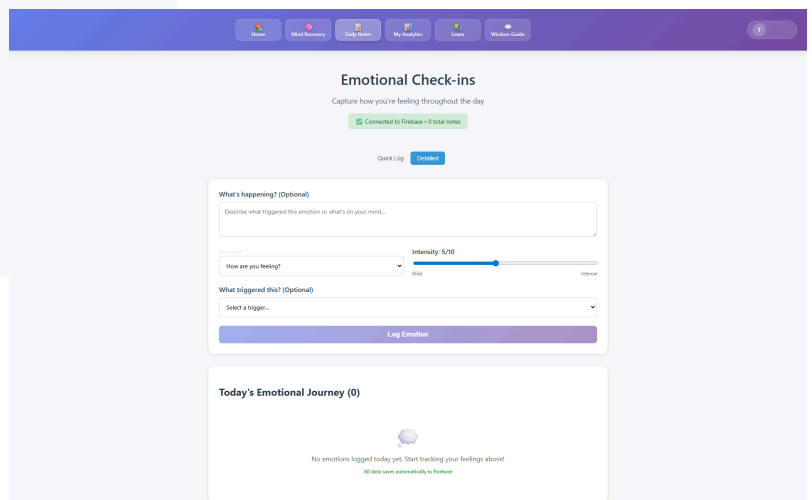

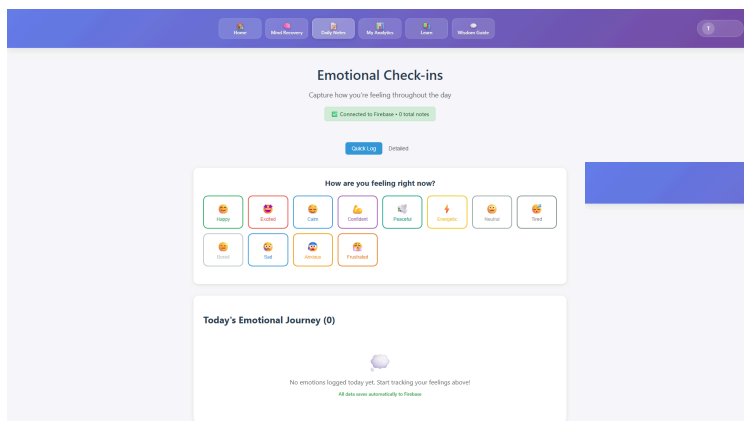

- Shows a complete profile alert if user haven't completed it yet
- Include practice stages and learning resources there

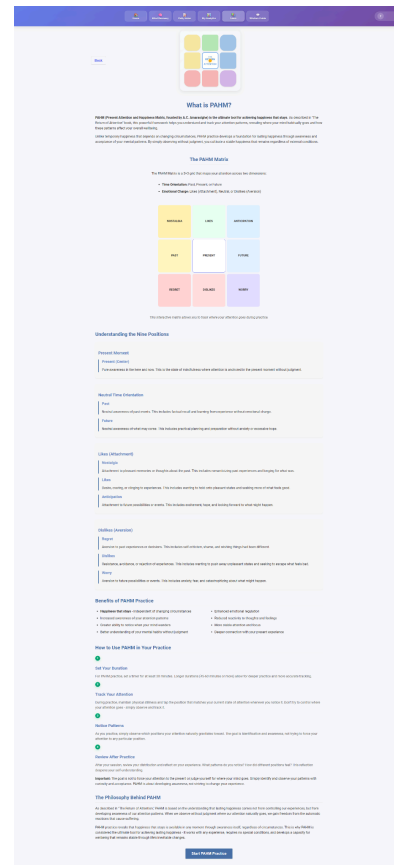

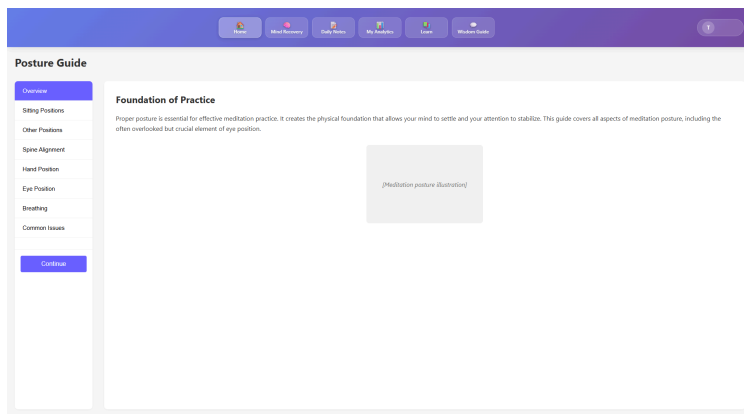

Mind Recovery Tab : Have exercises for different times with PAHM Matrix and timers
This should be unlocked only if the user completed stage 1. Also before practice mind recovery they should complete learning resource which explain about PAHM matrix. Also there should be a recommendation for the mind recovery exercise based on the time, which user trying to do it. (if he do mind recovery at morning, morning recharge exercise should recommended to him, like wise)

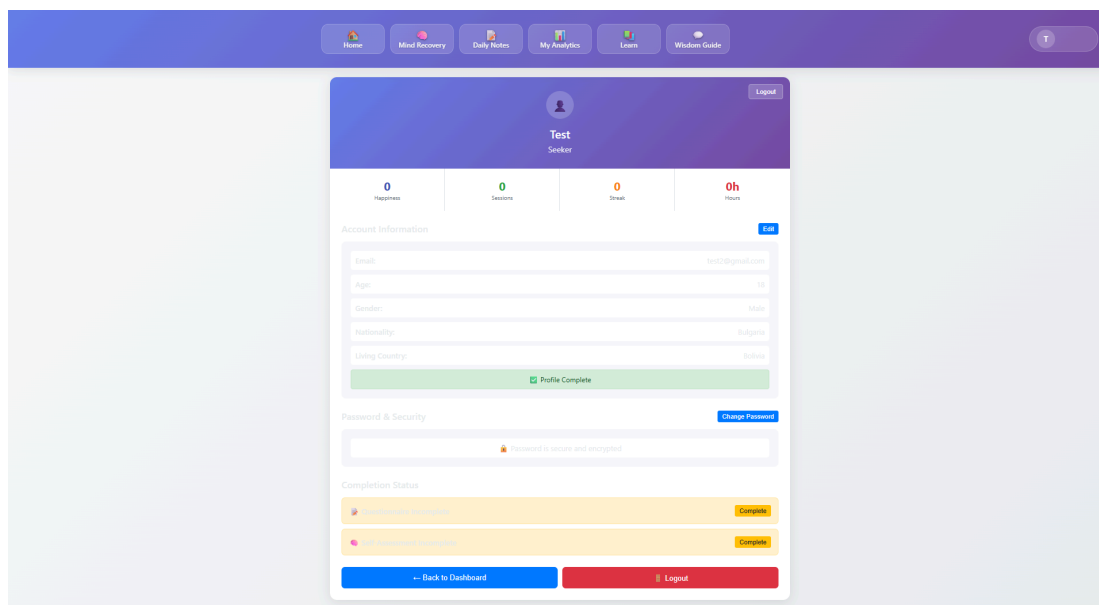

Daily Notes Tab : can record feelings throughout a day, quick log with an emoji or a detailed log with a note

Learn page with resources : with separate tabs for different categories

Account Page : Account details, stats about training (happiness score, training hours, no of sessions completed, streak (daily login streak)) Also it should show the users answer for self assessment. (there are 3 self assessments, initial one, midstage one(pops after completing 3 stages), final self assessment. There should be a better way for them to compare there answers for these assesments from here)

For profile completion : Should Complete a Questioner and a self assessment

Question 1 of 27 4%

Mind Recovery What is PAHM?

Learning Resources

Stage 1 Guide
Learn about your current stage and practice techniques

Posture Guide
Find the optimal meditation posture for your practice

PAHM Matrix Explained
Understand the Present Attention and Happiness Matrix

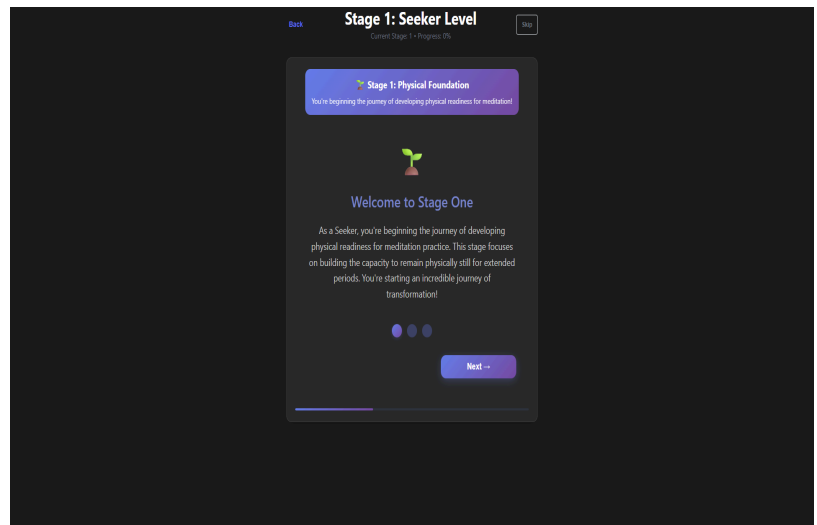

Practice Stages:

1st Seeker stage is to practice physical stillness, there's only a timer.

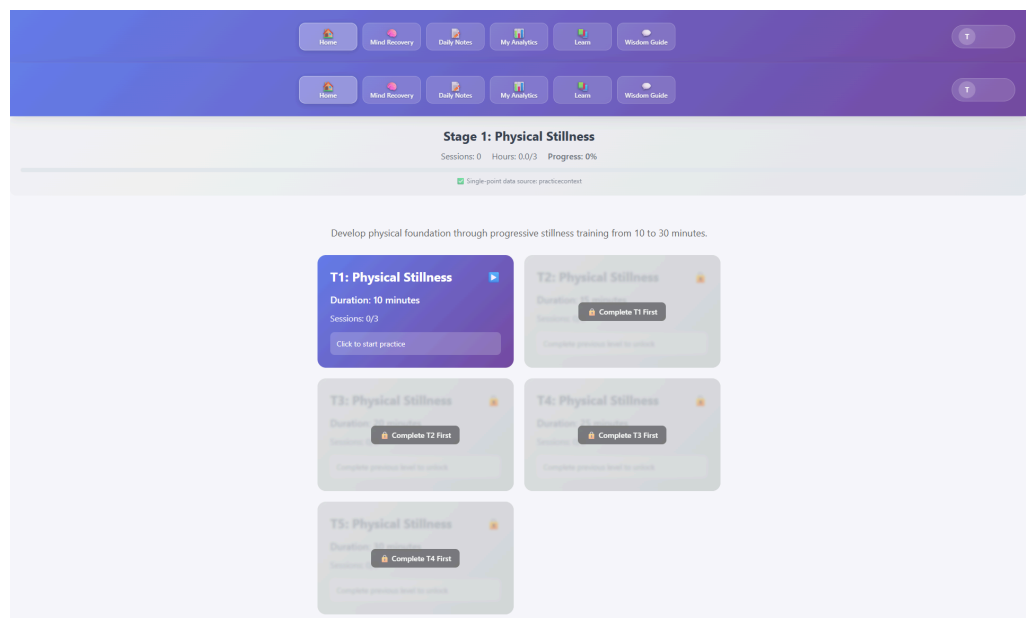

An intro about

The stage. This should be completed

To access the sessions.

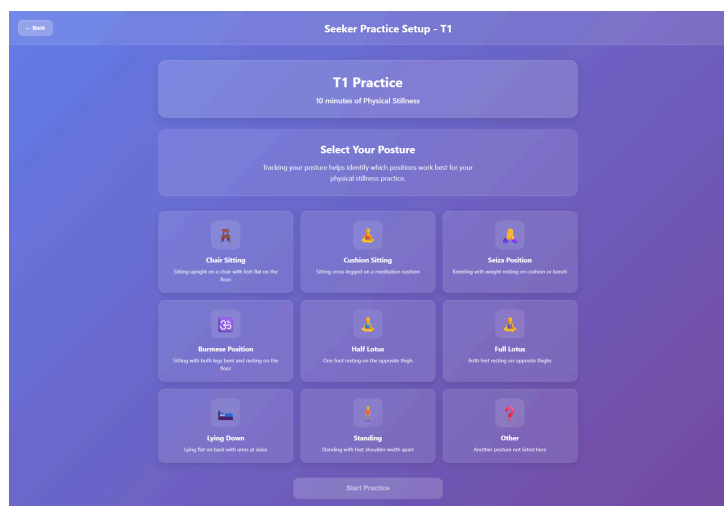

Session in
stage 1

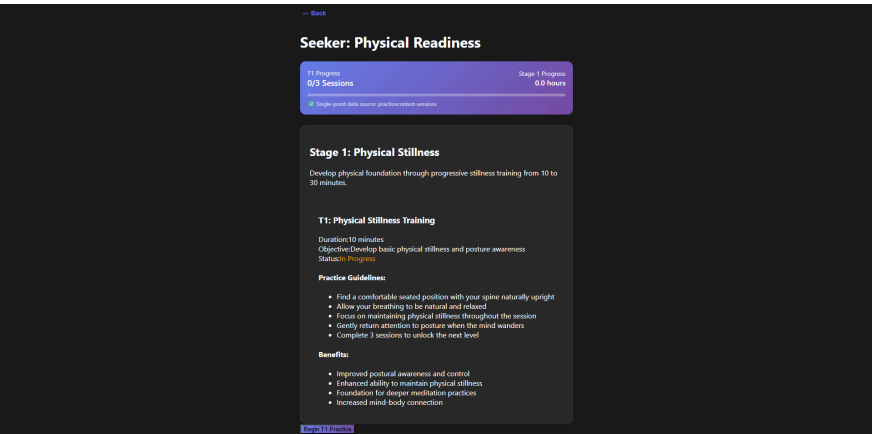

Select Posture

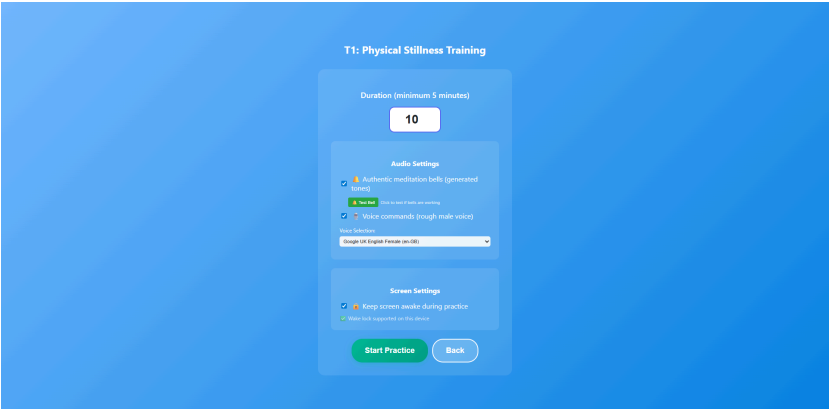

This page is common for
every session in every stage

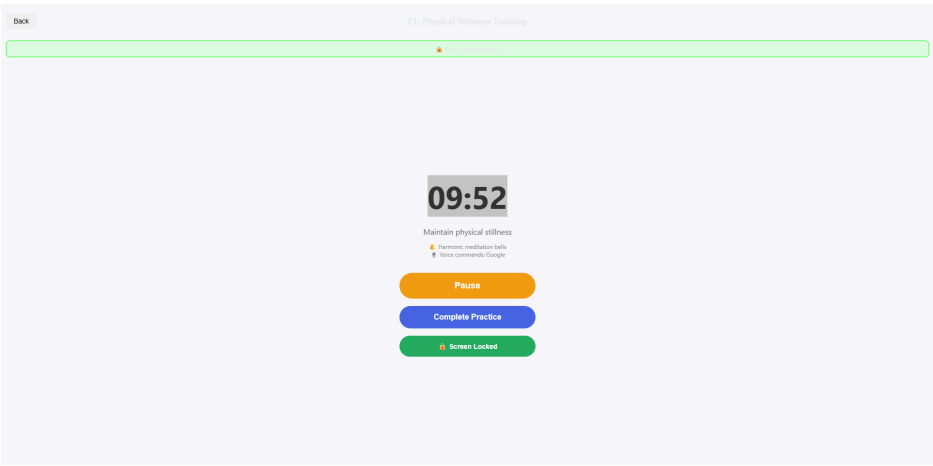

A intro about the session

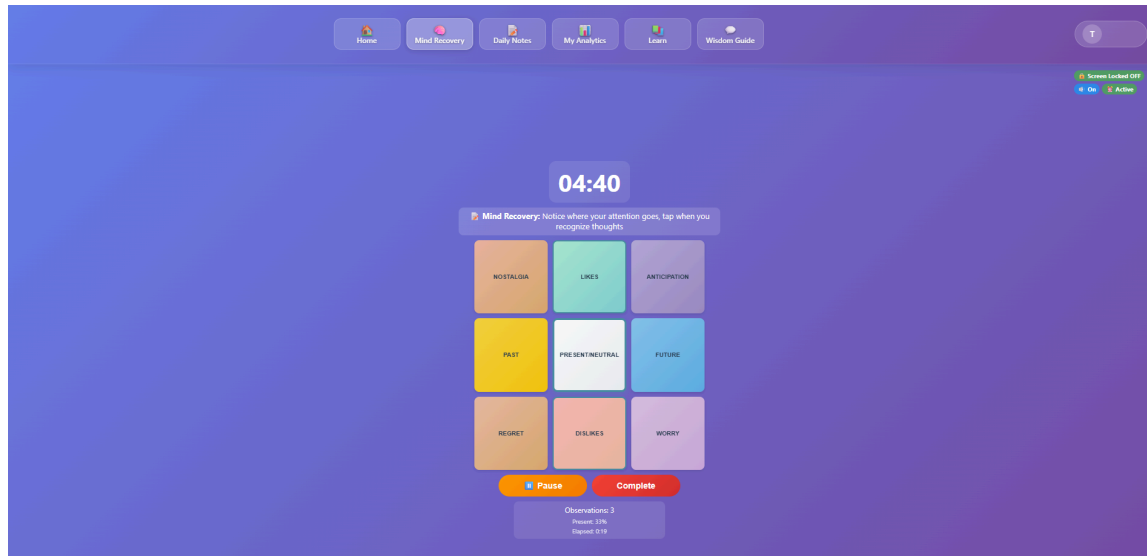

Set the timer , it should have
Min time.
For every min completed
It should ring a bell, and guided
voiceovers should be there for like
5 min remaining, 1 min remaining,
session completed.

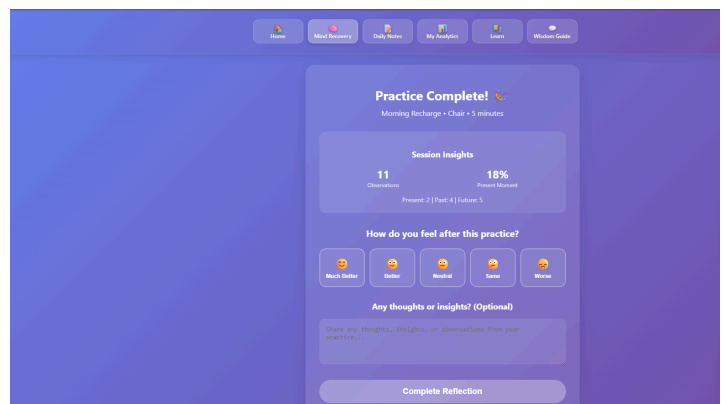

Timer for stage 1

PAHM Matrix : include a timer with 9 clickable buttons, each button click should be recorded in the database with the timestamp of the button click (this should include in stage 2-6)

Practice Complete Page: Show stat about the exercise. 1 common completion result page for mind recovery and exercises of stage 2 onwards, and a separate one for stage 1 exercises.

Should be an admin panel where we can see every info from the database, about user count, sessions completed, any errors, delete or edit records, give admin privileges to users. Also to test every session. With a speed changeable timer. Notification center about any actions we need to take (like if our free firestore storage is exceeding etc)
